I am a professional developer with more than 2 years of experience. Currently, my primary interest and focus lie in becoming a **Software Engineer** due to my affinity for logical problem-solving. I have a passion for acquiring new knowledge and possess the ability to learn quickly. Furthermore, I am adept at working collaboratively and effectively within a team.

PROFESSIONAL EXPERIENCE

Freelance Backend Developer

December 2023 – February 2024

JavaMifi

Building an API for injecting SIM cards from various collaborating vendors with the company.

Freelance Fullstack Developer

October 2023 – November 2023

PT. Texio Mitra Digitalisasi Indonesia

Adding a system for managing Value Added Tax (VAT) on the website and also a REST API for consumption needs in the mobile app.

Cloud Computing Learning Path Student

January 2023 – June 2023

Google, Tokopedia Gojek & Traveloka

Enhanced proficiency in cloud computing skills and soft skills through participation in the "Bangkit" program organized by Google, Tokopedia Gojek & Traveloka.

Fulltime Junior Developer

October 2021 – January 2023

Wahana Gumilang Group

Revamped the frontend of a laboratory information system application utilizing nuxt.js technology. Conducted maintenance tasks for existing applications.

Internship Fullstack Developer

June 2021 - September 2021

Wahana Gumilang Group

I and my team built an information system website for the company using nuxt.js and express.js technologies, encompassing both the frontend and backend aspects.

Freelance Developer

September 2021 – November 2021

PT. Texio Mitra Digitalisasi Indonesia

I and my freelance partner collaborated to create a website offering freelance services using laravel.

EDUCATION

- **Bachelor of Informatics Engineering**
Electronic Engineering Polytechnic Institute of Surabaya
- **Computer and Network Engineering**
Vocational High School 1 Tuban

July 2019 – March 2024

July 2015 – May 2018

ACHIEVEMENT

Runner-up of the National Web Design Competition at the Informatics Champions 2020
Universitas Negeri Surabaya

September 2020

PROJECT

Knowledge Graph Using LLM, Azure OpenAi

February 2024 – February 2024

The Knowledge Graph App is designed to provide information based on user queries and visualize the data in the form of a knowledge graph.

Auto Send Email Using Python, Vuejs, and SQLite

February 2024 – February 2024

The main function of the endpoint is to store in the database an email for a particular group of recipients. The emails are then to be sent automatically at a later time.

Dental detection application

January 2023 – October 2023

Designed and currently developing a tooth detection application as part of my final academic project utilizing flask(python) and YOLO.
